

5 Feet Semi Champion Rotavator

The 5 Feet Semi Champion Rotavator by Maruti Rotary is a sturdy and efficient agricultural machine used for land preparation and soil cultivation. Manufactured using durable steel materials, this rotavator helps in breaking soil clumps, mixing residues, and creating a fine seedbed for farming operations. Its semi champion design ensures reliable tilling performance, smooth field operation, and long-lasting durability. Compatible with tractors, this implement is suitable for agricultural fields requiring effective soil turning and improved productivity. The strong build quality and efficient working mechanism make it a dependable choice for modern farming applications.
