About Us

We have been in the senna business for the last 12 years. We are involved in all part of the plants production, from cultivation to exporting of Sonamukhi Senna Leaves, Calcium Sennoside Powder, Cassia Angustifolia Senna Pods, Senna Seeds, etc. Our main objective is to deliver high-quality items, which has allowed our team to work with focus. The dedication of our manufacturer and supplier firm have enabled us to grow from a small trading company into a big conglomerate. Since we had always wanted to build a manufacturing facility that had everything required to meet the standards of the European and American markets, we launched our manufacturing plant with amenities and equipment that met GMP and ISO criteria.

We are also connected to nature and have our plant is surrounded by a beautiful garden. For testing and research, we have our own UV and HPLC equipment along with any required add-ons to meet requirements. We come from farming family and are members and the chairman of the Gujarati village of Bhachaus (Kutch Farmers) Association of Senna. Our goal is to undertake research for farmers to assist them in getting the highest pricing and crop yield.
