About Us

Ramesh Engg. Works is a blue-chip company, catering to the market requirements as a manufacturer, exporter and supplier of Chamber Type Shrink Machines, Semi Automatic Shrink Machines, Industrial Conveyor Systems, L-Sealer Machines etc. These are developed from precision engineered components and spares that are sourced from reliable vendors. Offered in various technical configurations and models, our machines are known for their simple operations, excellent productivity, longer functional life, minimal maintenance and outstanding performance. Further, the range of Plastic Packaging Materials such as Packed Samples and Polyolefin (POF) Shrink Films we offer is praised for its fine finishing, lightweight and attractive looks. With such superior quality products, we are regularly catering to the needs of pharmaceutical, stationary and plastic industries.

Over the years, we have been able to set various milestones of growth & success due to support of a proficient workforce. It includes professionals of various fields, working together with dedication to win and maximize contentment of respectable clients. Further, various sophisticated machines and tools are given by us to employees so that they can complete their assigned tasks in a fast way. Perfect amalgamation of our talented employees with infrastructural facilities have enabled us to stand ahead of our counterparts.
