

Sarvotam Dan Biomass Fuel Pellets

Product Description:

Sarvotam Dan Biomass Fuel Pellets are eco-friendly and high-efficiency fuel pellets manufactured from natural agricultural and wood waste materials. These pellets are widely used in industrial boilers, heating systems, furnaces, and biomass energy plants. The product provides clean combustion, high calorific value, and reduced ash generation, making it an ideal replacement for conventional fuels.

Specification	Details
Product Name	Sarvotam Dan Biomass Fuel Pellets
Material	Wood Waste / Agricultural Biomass
Shape	Cylindrical Pellets
Color	Brown
Moisture	Low Moisture Content
Usage	Industrial Heating & Boilers
Ash Content	Low
Eco Friendly	Yes
Packaging	Bag Packaging Available
