## About Us

Incepted in the year, 2001, we, P-Square Technologies, are reckoned as one of the topmost manufacturers and suppliers of Industrial Equipment. The products we deal in includes Pollution Control System, Granule Filling Machine, Gas Scrubber, Vibrating Equipment, Industrial Vacuum Systems, Industrial Process Equipment, Material Handling Systems, etc. We have acquired this noted position in the market owing to our quality products, effective services and extensive knowledge of our mentors. Besides, our products are known for their sturdiness, reliability and durability and cater to various industries like automobile, engineering, electronic, machine tools and many others.

For manufacturing high end equipment, we have set up a modern and advanced manufacturing unit that has all the requisite machines and tools. It is backed by proficient and knowledgeable professionals, who have years of experience in the respective field. Under their guidance and support, we are manufacturing topmost products in line with internationally accepted standards. Besides, we are a quality conscious firm and therefore, we adhere to a firm quality control policy. Our expertise has enabled us to provide complete solutions to cater numerous industrial requirements and timely deliver these at the clients' end.

## Infrastructure

Our infrastructure was established in Pune and is appropriately accessible with transportation facilities, communication, water and other facilities. The infrastructure is segregated in to different units like manufacturing unit, designing unit, warehouse section and quality control unit. All the units are supported by qualified and trained professionals, who make proper utilization of the available resources. Moreover, our manufacturing and designing unit has all the requisite machinery to develop optimum equipment that is used in various industries. Again, our professionals keep all the units technologically upgraded for the overall performance of our manufacturing facility.

## Quality Assurance

For this, we have developed a separate quality inspection section, where, we conduct different quality tests of our hi-tech equipment. The unit is backed by a team of experts and knowledgeable quality controllers who assure that the products are perfectly functional and are in accordance to the global standards. In order to check the products, our quality controllers follow industry set guidelines.

# Our Prodcuts

**Screw Conveyors**

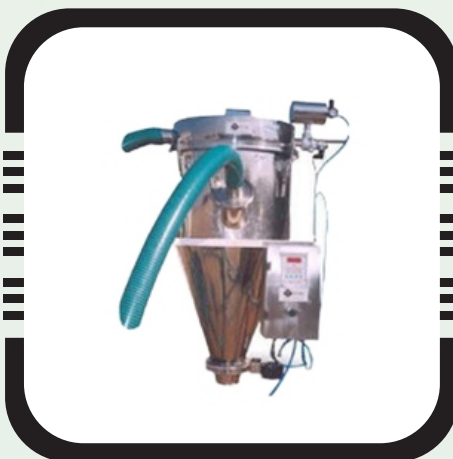

**Dense Phase Pressure Conveying System**

**Dilute Phase Pressure Conveying System**

**Pressure Conveying System**

**Vacuum Conveying System**

**Pneumatic Conveying System**

**Dust Control Equipment**

**Portable Dust Collector**

**Industrial Dust Extraction System**

**Bag Filter Systems**

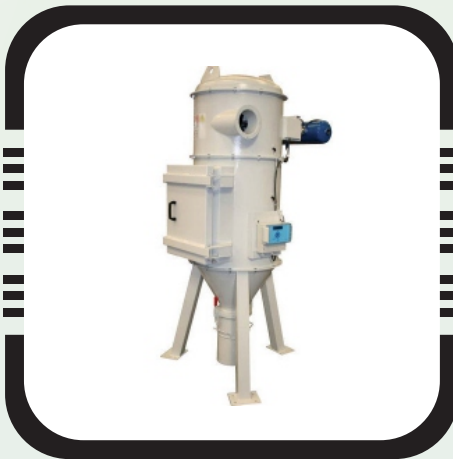

**Pollution Control Scrubbers**

**Pollution Control Systems**

**Dust Collection System**

**Cartridge Dust Collectors**

**Bag Filtration System**

**Air Pollution Scrubbers**

**Venturi Scrubber**

**Air Pollution Prevention Cyclone**

**P Square  
Technologies**
