About Us

Shreya Engineering Trading Corp is a name to reckon with in the field of industrial coding and marking solutions, providing a full range of products and services designed for today's production environments. As a trader, supplier, and service provider, the focus is on providing excellence through products that provide crisp, consistent, and durable prints on almost any substrate. From industrial printer inkjet and linx printer ink to batch coding inks and cutting-edge equipment such as automatic TIJ inkjet printers, CO2 laser marking machines, and hand coder machines, all the solutions are developed to give industries the power of precision, durability, and performance.

For being known to facilitate smooth integration within installed manufacturing systems, the coding machines and printers facilitate high-speed production lines with quick-drying inks, excellent adhesion, and environmentally friendly composition. Whether it is a milk pouch batch coding machine, cable batch coding machine, or the bentsai mini hand powerful yet small TIJ printer, all products are created with minimal maintenance in mind, easy operation, and high quality. These solutions address the most demanding industrial challenges, managing extreme environments, fragile products, and stringent timelines, and producing smooth and dependable output. Supported by sophisticated technology, customized functionality, and contact-free printing capacity, the machines provide unparalleled flexibility and character definition. From pharmaceuticals and food items to cables, pipes, and beverages, the products serve diversified industries with no compromise on quality or productivity.
