Fiber Supplement**

Light, Clear & Clean-Naturally

About Us

Founded in **2023** by visionary entrepreneur **Neel Patel**, **Sai Psyllium Industries** has rapidly emerged as a trusted name in the global psyllium market.

Based in Unjha, the heartland of India's psyllium processing, we are dedicated processors, manufacturers, and exporters of premium psyllium products.

In just two years, we've proudly served over **360+ wholesale clients** worldwide, exporting quality from India to markets across world. Our journey is driven by commitment to quality, customer satisfaction, and sustainable practices.

At Sai Psyllium Industries, we blend traditional expertise with modern manufacturing to deliver purity and performance you can trust.

State-of-the-Art Manufacturing Facility

At Sai Psyllium Industries, we proudly operate a large-scale factory equipped with **108 advanced grinding machines**.

This extensive capacity allows us to:

- ✓ Produce high volumes efficiently.
- ✓ Offer a wide range of mesh sizes in psyllium powder (from 40–100 mesh).
- ✓ Offer a wide range of psyllium husk (from 50–99 grades).
- ✓ Deliver consistent, custom-ground psyllium products tailored to client needs

With one of the largest psyllium grinding setups in the region, we ensure speed, flexibility, and unmatched product quality.

Our Product Range

We offer a complete portfolio designed to meet diverse industry needs:

Psyllium Husk

Available in various purity grades: 50% - 99% – ideal for food applications, dietary supplements, pharmaceutical formulations, and wellness blends.

Psyllium Husk Powder

Milled to perfection in different mesh sizes (from 50–100 mesh). Higher mesh delivers ultra-fine powder, custom-ground as per specific market requirements – ideal for instant beverages, baking mixes, and nutritional products.

Psyllium Kha-Kha Powder

Psyllium Industrial Kha-Kha Powder, a byproduct of psyllium husk processing, is widely used to prevent soil erosion, enhance landscaping, and as animal feed—especially for horses. With purity levels of 60–80% and a swell volume of 16–35 ml/g, it's also ideal for pathways, courts, parks, and garden applications.

Sortex Seeds

Psyllium, a medicinal plant grown mainly in Gujarat, Rajasthan, and Madhya Pradesh, is valued in traditional medicine for its natural husk that relieves constipation. Its cleaned, dried seeds from *Plantago ovata* are free of impurities and contain about 40% linoleic acid, an essential fatty acid beneficial for health.

Our Retail Brand

FIBER HULK

Bringing the benefits of psyllium to daily life under our brand **FIBER HULK**.
