

Commercial Cold Storage

Commercial Cold Storage is designed for preserving perishable products such as fruits, vegetables, dairy products, seafood, pharmaceuticals, and frozen foods. These storage systems maintain controlled temperature and humidity conditions to ensure product freshness, quality, and longer shelf life. The structure is manufactured using insulated PUF panels with advanced refrigeration systems for energy-efficient performance.

Specification	Details
Storage Type	Commercial Cold Storage
Temperature Range	-25°C to +15°C
Panel Material	PUF Insulated Panels
Insulation Thickness	60 mm / 80 mm / 100 mm
Cooling System	Energy Efficient Refrigeration Unit
Power Supply	220V / 380V
Application	Food, Dairy, Pharma, Frozen Products
Door Type	Hinged / Sliding Insulated Door
Humidity Control	Available
Usage	Industrial & Commercial

Key Features:

- Heavy-duty insulated construction
- Low power consumption
- Uniform cooling performance
- Corrosion resistant body
- Easy installation and maintenance
- Long operational life
