

Non Woven & Woven Filter Media

Overview

- TFI offer Wide range of Filter Fabrics through Needle Punch technology & Weaving technology. Our Filter fabrics are used widely for different application for filtration of air, Liquid and Dust. Non-woven filter fabrics made of PP, Polyester, Glass fiber, Cotton, Satin, Viscose etc. are most suitable for Pre filter Applications in Control panels etc.
- Woven filter cloths are used in Filter press, Pulverizer, Vacuum Drum, Vacuum Belt & Rotary drum filter systems for effective cake release & clear fluid processing.

Features & Benefits

- Crack resistance
- Range of pollution control and product recovery applications
- Precisely designed
- Optimum finish

Application

- Compressed Air
- Chemical, Process fluids
- Dust collection system
- ANF

Specification

- Filter media : Polypropylene, Polyester, Glass fiber, Cotton etc.....
- Size : Customize
- Filtration Rating : For air & gas : 1, 3, 5, 10, 20um
