Features Product

Manufacturing Electronic Products and has been consistently selling the same across the country successfully.

Laser Cutting

We are offering custom laser cutting services on Mild Steel, Stainless Steel, Brass, Aluminum, Copper. Our company is well equipped with advance machines to deliver economical cutting edge solutions for producing a variety tools and components in whatever design and pattern you want. Our machines have latest software to deliver perfect & precise cuttings.

OUR SERVICES

CNC Bending

Traditionally CNC programming is done on the shop floor, on the CNC controller of press brake. We use latest software for CNC which defines the bending sequence, finger stop placement, simple programming for CNC controller resulting in high productivity and lower wastage in terms of shop floor press brake time.

Interior & Exterior Designs

We design planning and implementation team, creating design plans and selecting products for your windows, gate, walls, floors, and more. We will bring your design plans to the table at one of our local showrooms or at your home.

Design & Development

We provide design and development services to ensure functional, cost effective and reliable products. Precision of fabrications/assemblies depends on the jigs and fixtures used to manufacture them.

Electrical Panel

We offer a wide range of Medium Voltage electrical products which are designed, developed & Type tested in accordance with relevant standards & specifications of IEC & IS to meet the customer's requirements. IP-55 Tested construction of Drawout panels provides trouble free operations in any season.

Welding & Fabrication

We are engaged in rendering Welding & Fabrication Services to our customers. These fabrication services are rendered by making use of modern tools and machines that are operated by our team of experienced professionals.
