

NBT for Aquaculture

Customer faith well-kept for
lifetime.

Cross Flow Ultrafiltration System, Dynamic Hydrodynamic Device (Stator-Rotor Based), HF Membrane Spinning Unit, Industrial Grade Oxygen Concentrator, Industrial and Commercial RO System, Lab Scale MBR, NBT for Agriculture and Horticulture, NBT for Aquaculture, NBT for Lake and Pond Treatment, NBT for STP, ETP, WTP, Ozone Generator for Drinking Water, Ozone Generator for STP, ETP, etc.

**NBT FOR LAKE AND POND
TREATMENT**

**NBT FOR AGRICULTURE AND
HORTICULTURE**

**INDUSTRIAL GRADE OXYGEN
CONCENTRATOR**

About Us

Prasinos Tech Innovations Private Limited brings together technology and sustainability to revolutionize water treatment across industrial and commercial sectors. As a manufacturer and supplier, the company pioneers advanced, chemical-free solutions designed to protect the environment while enhancing system performance. Products like ozone based nano bubble generator, reverse osmosis membrane testing unit systems, commercial ro system, reverse osmosis membrane housing, and lab scale mbr unit are developed with precision engineering and backed by in-depth research.

Cutting-edge systems such as hollow frp membrane machine, solar based ultrasonic algae control device, ozone generator for stp, and static hydrodynamic cavitation reactor are engineered to deliver unmatched results in water quality improvement. These solutions are compact, energy-efficient, and require minimal maintenance, supporting cost-effective operations with reliable and consistent performance. They are compatible with existing infrastructures, reduce sludge generation, and contribute significantly to sustainability goals by lowering carbon footprints and eliminating the use of harmful chemicals.

Founded in 2022 and headquartered in Hyderabad, Telangana, India, Prasinos Tech Innovations Private Limited is a forward-thinking organization dedicated to redefining water treatment technology. As a manufacturer and supplier, the company offers an extensive range of innovative products including ozone based nano bubble generator, commercial ro system, lab scale mbr unit, solar based ultrasonic algae control device, and static hydrodynamic cavitation reactor. Driven by a passion for sustainability and backed by technical excellence, the firm designs compact, efficient, and eco-friendly systems suitable for diverse industrial and commercial applications.

Key Facts

No of Staff	10
Year of Establishment	2022
OEM Service Provided	No

Our Products

**Industrial Grade
Oxygen Concentrator**

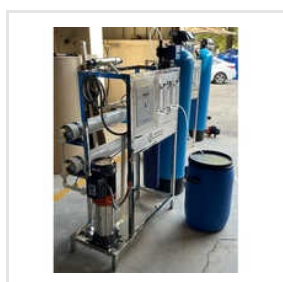

**RO, UF, FO Membrane
Test Skid**

**NBT For Lake And Pond
Treatment**

**Ultrasonic Algae
Control Device For**

**Industrial And
Commercial RO**

**Cross Flow
Ultrafiltration System**

Lab Scale MBR

**HF Membrane Spinning
Unit**

**NBT For Agriculture
And Horticulture**

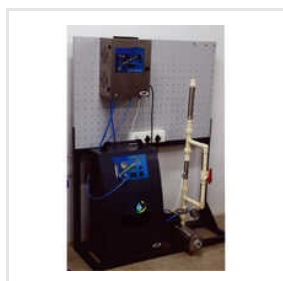

NBT For Aquaculture

**Dynamic
Hydrodynamic Device**

**Ozone Generator For
STP, ETP, WTP**

**Ozone Generator For
Drinking Water**

**Ozone Generators For
Swimming Pool**

**Solar Based Algae
Control Device For**

**Static Hydrodynamic
Cavitation Device**
