About Us

Art Instruments Inc is a supplier and trader of precision instruments that help industries transform invisible measurements into visible confidence. With a strong understanding of testing, monitoring, and measurement requirements, we bring together dependable instruments for laboratories, cleanrooms, HVAC environments, pharmaceutical facilities, and other critical applications. Our portfolio includes Bubble Point Test Apparatus, Handheld Wireless Particle Counter, Air Quality Meter, and a diverse range of analytical and environmental monitoring instruments.

We believe that accurate measurement is not simply about numbers it is about making better decisions. That philosophy shapes our approach to product selection and customer service. We source instruments with attention to functionality, reliability, ease of use, and suitability for demanding professional environments. Particle counters, for instance, can support cleanroom verification and air-quality investigations, while air quality meters assist professionals in monitoring particulate and environmental conditions.
