

Prefabricated Godown Shed

Product Description

Prefabricated Godown Shed is a robust pre engineered steel structure designed for warehouses, storage facilities, logistics centers and industrial applications. Manufactured using premium quality structural steel, these sheds provide high strength, durability and quick installation while requiring minimal maintenance. The design can be customized to meet specific storage and operational requirements.

Key Features

- High quality steel construction
- Weather and corrosion resistant
- Fast installation
- Customizable dimensions and roofing options
- Low maintenance
- Long service life

Technical Specifications

- Material Structural Steel
- Surface Finish Painted or Galvanized
- Roofing PPGI Sheets Color Coated Sheets or Sandwich Panels
- Usage Warehouses Godowns Industrial Storage Commercial Buildings
- Installation Prefabricated On Site Assembly

Applications

Warehouses, industrial godowns, logistics parks, agricultural storage, manufacturing units and commercial storage facilities.
