

# MINERALS AND REFRACTORIES

Calcined Magnesite, Dead Burnt Magnesite, Industrial Dead Burnt Magnesite, Magnesium Oxide, etc.

**CALCINED MAGNESITE**

**MAGNESIUM OXIDE**

**DEAD BURNT MAGNESITE**

## About Us

Since 1971, Almora Magnesite Limited (AML), which is involved in the mining and processing of the mineral magnesite, has been a joint venture between SIIDCUL, TRL Krosaki Refractories Limited, and SAIL. We are among top five producers of magnesia in the country, with reserves estimated to be 8.84 million tonnes. By leveraging its more than 50 years of considerable industry experience, the Company has established itself as a pioneer manufacturer and supplier of Industrial Dead Burnt Magnesite, Magnesium Oxide, Calcined Magnesite, Dead Burnt Magnesite, etc. Due to our emphasis on quality, commitment to moral business conduct, and ability to attain absolute excellence, the brand AML has established itself as a name to trust. Due to their ability to provide consistent performance at higher temperatures (+22000 C), our products are in high demand in the refractory manufacture and furnace maintenance sectors of the steel, cement, lime, non-ferrous metals, glass, energy, environment, and chemical industries. Furthermore, we create different grades of magnesium oxide that are extensively utilized in the manufacture of magnesium sulphate, animal mixes, heat-resistant linings, and slag conditioning.

Our dependability, quality, and high performance are determined by a variety of factors, such as a plentiful supply of content, in-depth subject knowledge, a sturdy infrastructure, and a dedicated staff of experts. Our organizations basic beliefs encompass broader ideals including sustainable development, environmentally responsible mining, and job creation in the remote mountain communities of District Bageshwar & Almora. For more than 40 years, AML has been a key component of meeting the different needs of numerous industries and businesses. Due to our dedication to providing premium products at affordable prices, our products are in high demand in the steel industry, refractory manufacturing and furnace maintenance, slag conditioning, and the manufacture of magnesium sulphate and animal food additives.
