

# 25 to 500 Ton XCMG Hydraulic Mobile Crane

---

## Product Description:

The 25 to 500 Ton XCMG Hydraulic Mobile Crane is a high-performance lifting machine designed for heavy-duty industrial, construction, infrastructure, and engineering applications. Built with advanced hydraulic technology, this mobile crane offers superior lifting capacity, excellent mobility, operational safety, and high efficiency on demanding worksites.

These cranes are manufactured using durable and robust components to ensure reliable performance, stability, and long service life. The advanced boom structure and hydraulic system provide smooth lifting operations and precise load handling for various industrial tasks.

**Key Features:** Heavy lifting capacity ranging from 25 Ton to 500 Ton Advanced hydraulic operating system Strong telescopic boom construction Excellent mobility and maneuverability High operational safety and stability Suitable for construction, industrial, and infrastructure projects Durable design with low maintenance requirements

**Applications:**

Construction sites, bridge projects, industrial plants, heavy equipment installation, logistics operations, mining industries, and infrastructure development projects.
