

Zoomlion Hydraulic Crane

Zoomlion Hydraulic Crane is a high-performance mobile lifting solution designed for heavy-duty construction, infrastructure, industrial, and energy projects. It features a telescopic boom, advanced hydraulic system, excellent lifting capacity, and reliable stability for safe and efficient operation. Built on a robust multi-axle carrier, the crane offers superior mobility and can travel between job sites with ease. Modern control systems enhance precision, productivity, and operator comfort, making it suitable for demanding lifting applications such as bridge construction, wind power installation, plant maintenance, and large-scale engineering projects.
