

## PRESSWOOD PALLETS

Presswood Pallet are designed with Environment-Friendly technology, considering customer convenience

## INTRODUCING PRESSWOOD PALLET

Presswood pallets are a type of pallet made from compressed wood fibers. They are environmental friendly because they are made from recycled wood waste. These pallets are lightweight, durable, and cost-effective, making them a popular choice for shipping and storage purposes instead of normal wooden and plastic pallets.

## FEATURES

### Space Saving

- Presswood pallets of the same size are stackable, allowing for easy separation using a forklift truck. The nesting feature of these pallets results in a storage space reduction of up to 66% compared to wooden pallets.

### Environment Friendly

- Presswood pallets are made of wood-based recycling product and recycled waste wood from saw mills and industry.

### Waterproof

- Waterproofed pallets can withstand exposure to water while enhancing

### Safe and Reliable

- The presswood pallet features a one-piece design without any nails or staples, minimizing product and package damage. By eliminating burrs, it also helps in reducing injuries to employees and customers.

### ISPM 15 Compliant

- Presswood pallets are acceptable for export into all over the world. The high temperature and pressure manufacturing process makes the pallets fumigation free and burns out all insect and larval infestations.

### Competitively Priced

- Presswood pallets are far more cost effective compared to traditional wooden and plastic pallets.

### Lighter Weight

- Presswood pallets are significantly lighter than traditional wooden pallets, weighing at least 30% less while maintaining the same level of efficiency.

### Single Piece Design

- The rounded edges of presswood pallets are ideal for ensuring cargo safety, while the reinforcing ribs enhance their loading capacity. These pallets are accurately sized, one-time pressed, and resistant to bending.

## PRESSWOOD PALLET TYPES & SIZES

**Molded**

**Rackable**

EVOPACK offers two types of pallets Molded & Rackable which can be used in for warehousing, shipment etc.

Ready available sizes:

**1000mm x 1000mm x 100mm | 1200mm x 1000mm x 135mm**

We offer:

**Customized sizes | Pallet Rental services**

COMPARATIVE ANALYSIS	Plastic Pallets	Pinewood Pallets	EVOPACK Pallets
Pallet cost	High	High to Moderate	Competitive
Heat Treatment / Fumigation	Not Required	Required	Not Required
Load Capacity vs Price	Very Low	Low	High
Environmental-friendly	Pollutes Environment	Contributes to Deforestation	Environment Friendly
Logistic & Storage cost	Competitive	High	Competitive
Negative Impact on FOREX	Yes	Yes	No
Rackability	Yes	Yes	Yes
Nestability / Space saving	Yes	No	Yes
Weight	Light	Heavy	Light

## CREDENTIALS

EVOPACK possesses several certifications that adhere to the quality, sustainability and compliance standards of the industry.
