

## Certificate of Analysis

### Acesulfame potassium, 99%

|                            |                                                                                           |
|----------------------------|-------------------------------------------------------------------------------------------|
| <b>Synonyms</b>            | : Acesulfame K, 6-Methyl-1,2,3-oxathiazin-4(3H)-one 2,2-dioxide potassium salt            |
| <b>Code</b>                | : A 3179                                                                                  |
| <b>Mol. Formula</b>        | : C <sub>4</sub> H <sub>4</sub> KNO <sub>4</sub> S                                        |
| <b>CAS</b>                 | : 55589-62-3                                                                              |
| <b>Mol. Weight</b>         | : 201.24                                                                                  |
| <b>Applications</b>        | : A 3179 (OTTOKEMI) Acesulfame potassium, 99% Cas 55589-62-3 - used in chemical research. |
| <b>Properties</b>          |                                                                                           |
