

L Shaped Mild Steel Angle – Product Description

Product Description

L Shaped Mild Steel Angle is a structural steel section manufactured from mild steel. Its L-shaped profile provides strength and support and makes it suitable for construction, fabrication, framing, brackets, support structures, and general engineering applications. It can be supplied in customized sizes and thicknesses according to project requirements.

Product Name	L Shaped Mild Steel Angle
Type	L Shaped Angle
Material	Mild Steel
Size	Customised
Thickness	1.2–4 mm
Length	6 Meter
Color	Grey
Surface Finish	Galvanized
Grade	High
Weight	As per size

Applications: Construction, structural framing, fabrication, support structures, brackets, machinery frames, and general engineering work.
