

MS Channel – Product Description

Product Description

MS Channel is a structural steel section manufactured from mild steel and formed into a U-shaped channel profile. It is designed to provide strength, support, and rigidity in structural and fabrication applications. MS channels are commonly used in construction, industrial structures, frames, supports, platforms, and general engineering work.

Product Name	MS Channel
Product Type	Mild Steel Structural Channel
Material	Mild Steel
Profile	U-Shaped Channel
Size	Customised
Thickness	As per requirement
Length	6 Meter / Customised
Color	Grey
Surface Finish	Mill Finish / Galvanized
Grade	As per requirement
Weight	As per size

Applications: Building structures, structural framing, support beams, industrial sheds, platforms, machinery frames, fabrication, and general engineering applications.

Note: Exact dimensions, grade, thickness, weight, and surface finish should be confirmed according to the manufacturer's product specification.
