

Electronic Jacquard For Narrow Fabric Loom

We have successfully developed Microsoft windows based software system specially for interfacing with our narrow fabric Jacquard loom controller. It includes a complete set of basic functions for production of Jacquard patterns. It has Features Like :

- Operated using a mouse for the rapid, easy and total control of all functions.
- Significant editing tools giving designers the freedom to manipulate a design in the most artistic way.
- Provides auto repeat function in the design area.
- High Performing Computerized Jacquard System
- Pattern introduced directly from Module.
