About Us

It is worthwhile mentioning here that every synthetic cushion court doesn't guarantee you the reduction in fatigue and injury. Court making is a heavy investment therefore trust the reputed one with proven technology. Like all that glitters is not gold similarly all synthetic courts are not value for money and durable.

Rebound Ace surface is based on pure acrylic resins, proven by research of more than 20 years. It believes in making durable and long-lasting Synthetic Flooring such as Synthetic Tennis Court, Synthetic Basketball Court, Synthetic Cricket Pitch, Synthetic Lawn Tennis Court, etc.

Rebound Ace can be installed on both Asphalt and Concrete surface, and due to very high abrasion and wear resistance properties the surface means longer life. We believe in providing the best Sports Flooring. We value your investment, therefore we don't offer low end systems which are only aesthetically good but not good surface to play on.

The present usage of Rebound Ace surface in the venues of Commonwealth games 2010 in New Delhi, where tennis is played almost 14 hrs a day 365 days a year, are testimony to the fact that unlike other products available in the market, Rebound Ace is the most economical and durable one.

Today Rebound Ace surface has the distinction of being the only surface in the world which was laid in all the important tennis venues in the world like Olympics, Youth Olympics, Asiad, Grand Slam, Commonwealth and very recent WTA in Turkey. No other surface in the world can match this credential.

Why Rebound Ace India?

The toughness and non-slippery nature of these surfaces make them ideal for installing in multi-use centers like clubs, schools, colleges, resorts, stadiums, community centers and auditoriums. These surfaces are suitable for most kinds of indoor and outdoor sports and are guaranteed to last longer, provide more durability and offer great comfort to the player. The Rebound Ace India surfaces are non-glare and slip resistant, thereby helping players by providing them a sure footing in both wet and dry conditions. We have Flooring for Tennis Court, Lawn Tennis Court, Badminton Court, and more.
