About Us

Green Agritech Equipment is another name for Trust & Integrity. The faith entrusted by our valuable customers motivates us to achieve excellence in product innovation as well as customer service. We continue to be a well renowned name in the domain of seed testing and allied equipments. Established in the year 2007, we have been complying with the highest industrial standards as well as norm while designing our products. An ISO 9001:2015 certified company, we are known as a leading Manufacturer, Exporter, Trader and Supplier. We offer Grain Moisture Meter, Portable Grain Moisture Meter, Sample Divider, Rice Polisher, Paddy De-husker, Seed Analysis Kit, Seed Germinator, and more. Each and every product is designed to exceed customers' expectations in terms of performance, efficiency, durability and accurate results. The Rice Polisher manufactured by us helps in improving appearance of rice as well as ensures gentle polishing & good quality of rice.

As an ISO 9001:2015 certified company, our motto is to assure best of quality to the customers at competitive price. Since the inception, we have been following a Rigorous Quality Control Policy in order to ensure highest standards in our Grain Moisture Meter, Sample Divider, Rice Polisher, Paddy De-husker, and more. To manufacture our range we make use of superior grade raw materials such as Aluminium Casting, MS Sheet, SS, Brass Sheet, etc. We are endowed with a modern quality testing lab equipped with latest instruments and testing machines such as multi meter. The finished products are tested on the basis of design, efficiency, surface finishing, and material strength.

We work as one of the leading manufacturers of Rice, Seed and Fruit Testing Lab Equipments. We offer a complete range of Seed Counter, Seed Germinator, and Chlorophyll Meter etc. Our products are known for simplicity, easy handling and accuracy. Based on SMT (surface mount device technology), our Micro Controller is ideal for seed germinator. It features 16x2 line alpha numeric LCD display, programmable time intervals for temperature & humidity etc., data logging facility, and membrane keyboard for entering the parameters. Also, there is programme lock to avoid changes in software calibration, control parameter etc.
