

Mini CNC Router Machine

The Mini CNC Router Machine is a compact and highly efficient precision machining solution designed for engraving, cutting, drilling, and carving applications. Built with a sturdy aluminum frame and precision linear motion system, it delivers excellent accuracy and repeatability for woodworking, acrylic processing, PCB fabrication, model making, and light metal engraving. Its user-friendly design, reliable spindle performance, and compact footprint make it ideal for small workshops, educational institutions, hobbyists, and prototype development. The machine offers smooth operation, low maintenance requirements, and consistent output, ensuring high productivity and professional-quality results across a wide range of applications.
