**SCG Smartwood** is made of synthetic fiber cement that is superior to ordinary synthetic wood with a special structure mixed with the structure of **SCG pure Silica Portland Cement** and a special type of **Cellulose Fiber** submitted to an autoclave process, so we are confident in the quality of every sheet in meeting SCG standards.

## COLOR Superiority with LOC

Color Loc technology locks every molecule firmly onto SCG Smartwood fiber with a special spraying technique developed especially for synthetic wood and submitted to a hot-cold heat curing process to help lock the paint for long lasting color, so colored Smartwood stays naturally attractive, looks like the real thing and lasts longer.

### 3<sup>rd</sup> Layer

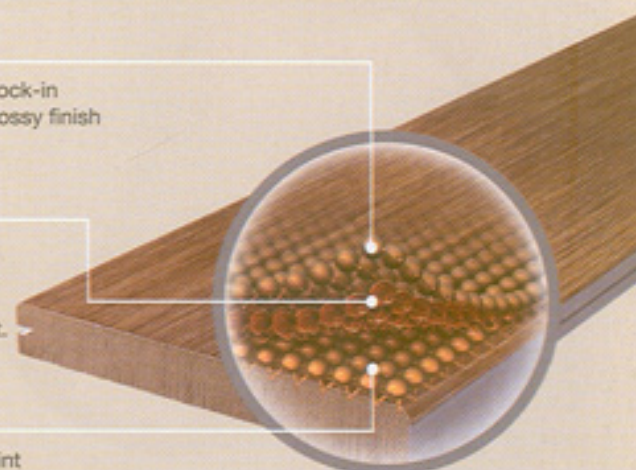

A clear coat to lock-in strength for a glossy finish

### 2<sup>nd</sup> Layer

Paint for wood finish tones and adherence to the clear coat.

### 1<sup>st</sup> Layer

Primer helps paint adhere to the wood.
