About Us

Powertrac Meters And Transformers is a brand name with a strong reputation in the electrical and energy management industry for providing efficient, innovative, and reliable solutions. As a prominent Manufacturer, Supplier, and Exporter, we are dedicated to designing and manufacturing sophisticated metering systems and transformers for various industries and utilities. Our strength is integrating technological innovation and engineering precision to offer products that provide accuracy, safety, and long-term performance.

Right from the inception, our organization has had a passion for excellence and customer happiness. Strong focus on research and development has seen us continually enhance our processes and product ranges in order to keep pace with the ever-changing needs of today's power management. Our product range includes cutting-edge solutions like Digital Energy Meters, LT & HT CT Operated Trivector Meters, Digital Panel Meters, Single Phase Control Transformers, and more, all designed to world-class standards of quality and reliability.

As an exporter, we have taken our operations beyond domestic levels to cater to international customers who require world-class products and services. Through our capacity to conform to international standards and certifications, we have been able to build a solid presence in several countries. This global exposure, besides showing the trust that we have gained, also challenges us to keep improving and innovating.
