## CRETOCURE 2006

[Corrosion Inhibiting Admixture Powder]

### Description

CRETOCURE 2006 is Bi-polar anti-corrosion material for steel reinforcement in concrete structures. It is used in different corrosion-protection systems: inhibition and coating system. CRETOCURE 2006 is a water-soluble powder utilizing Corrosion Preventive Technology for corrosion protection of all ferrous and non-ferrous metals including aluminum used in concrete

### Uses

- RCC elements/structures exposed to corrosive environment.
- Marine structures,
- Structures exposed to saline atmosphere,
- Coastal structures, sewerage systems, etc. like bridges, jetties, docks, mooring berths, railway sleepers, chlorinating plants, swimming pools, chimney, cooling towers, power plants, pipelines, etc.

### Advantages

- Non-deleterious unlike conventional rust converters.
- Effective even in the presence of high amount of chlorides.
- Does not affect bond strength of new concrete to reinforcement bars.
- Does not entrain air.
- Penetrates to rebar over a prolonged period and arrests corrosion of rusting steel.
- Non-toxic, eco-friendly.

### STANDARD COMPLIANCE:

ASTM G-59, ASTM G 106, ASTM C1582 / C1582M –11.

### Application Instructions

To be mixed in gauging water as per the set quantity in concrete batch plant.

### Dosage

300 grams per cubic meters of concrete.

### Packing

Available in 18 kg or as per site requirement in bulk quantity.

### Storage

12 months from date of production if stored properly In undamaged and unopened, original sealed containers at temperatures between +10°C and +40°C. Protected from direct sunlight and frost.
