## CRETOMIX CH-9

(Impermeable Chemical For Concrete and Mortar)

### Description

CRETOMIX CH - 9 is a ready to use impermeable chemical specially designed for concrete and mortar, in powder form, that acts as a highly efficient water proofing compound.

### Uses

CRETOMIX CH - 9 is recommended for use in structural and mass concrete, particularly for water-proofing structures, such as:

- Reservoirs and dams
- Sewerage works
- Canals
- Foundation and retaining walls
- Roof slabs and
- Wherever waterproof concrete is required

### Advantages

- Improved water tightness
- Chloride free - does not attack reinforcement
- Non-toxic
- Normal setting time at recommended dosage

### Dosage

Normal dosage is 1-2 kg per bag of cement. Recommended with all types of Portland cement including SRC.

### Surface Preparation & application:

All surfaces must be clean and free from all loose particles and dust. Inverse covings should be made on the junction of wall and base slab. All cracks should be sealed with thick paste of 5-part cement: 1 part CH-9: 2-part water.

#### For Primer

After completion of surface preparation Mix 1 bag cement: 1 Kg CH-9: 35 ltr Water in slurry consistency and apply on prepared surface using a brush or roller. If the surface is very porous then 2 coats can be applied at an interval of 6-8 hours.

#### For waterproofing

After completion of surface preparation Mix 1 bag cement: 2 Kg CH-9: 35 ltr Water in slurry consistency and Pour it on the concrete surface to be water proofed and spread with a broom. The mix will cover an appx. Area of 500 – 600 sqft. The mix can also be applied using a brush or roller for better results.

### Form

Off White mineral powder.
