Purpose and Advantages

The ECG Machine is primarily intended for recording and monitoring the electrical activity of the heart. It supports healthcare professionals during routine cardiac examinations and clinical assessments. The 12-channel configuration provides simultaneous ECG information from multiple leads, while the LCD display allows readings and waveforms to be viewed conveniently.

- **12-channel recording:** Enables simultaneous acquisition of multiple ECG leads for comprehensive cardiac assessment.
- **Clear LCD display:** Provides convenient visualization of ECG waveforms and recorded information.
- **Manual operation:** Allows trained medical personnel to control the ECG recording according to patient and clinical requirements.
- **Clinical suitability:** Designed for use in professional healthcare environments.
- **Reliable supply:** New units are supplied from India with manufacturer/supplier support.
- **Warranty protection:** A 1-year warranty provides additional assurance against covered manufacturing defects.

Shipping, Samples, and Delivery

The ECG Machines can be handed over through major Indian FOB ports, supporting organized transportation for domestic and international buyers. Samples may be provided according to the supplier's sample policy for evaluation, demonstration, and product assessment. Interested buyers can request sample availability and delivery details before placing an order. The process is intended to make product evaluation and procurement more convenient.

Warranty

Each ECG Machine is offered with a 1-year warranty, subject to the supplier's applicable warranty terms and conditions. The warranty provides added confidence for healthcare facilities by offering coverage for eligible manufacturing defects during the specified warranty period.

Frequently Asked Questions (FAQs)

Q1. How does the manual operating mode benefit users in a hospital setting?

A: Manual operation gives trained healthcare professionals greater control over ECG acquisition and recording, allowing the device to be used according to different clinical requirements.

Q2. What warranty is included with the ECG Machine?

A: The machine is supplied with a 1-year warranty, subject to the supplier's terms and conditions, providing additional purchase assurance.

Q3. Where is this ECG Machine manufactured and supplied from?

A: The machine is manufactured and supplied from India by a reputed supplier/manufacturer, with after-sales support subject to the supplier's service terms.

Q4. How can a buyer request an ECG Machine sample?

A: Buyers can contact the supplier to request a sample according to the applicable sample policy. Availability, pricing, and delivery arrangements can be confirmed at the time of inquiry.

Q5. What makes this ECG Machine suitable for hospitals?

A: Its 12-channel recording capability, LCD display, manual operating mode, sturdy construction, new condition, and 1-year warranty make it suitable for professional cardiac monitoring and assessment.

Conclusion

The Premium 12-Channel ECG Machine is a practical clinical diagnostic device designed to support efficient electrocardiographic recording in healthcare environments. With its 12-channel configuration, clear LCD display, manual operation, sturdy construction, and 1-year warranty, it offers a combination of functionality and reliability for hospitals, clinics, and diagnostic facilities.
