*Capacity is based on Bordeaux type bottles 0.75 liter and subject to the number of shelves and display pattern.

Love of wine is proof of a true art of living. It signifies a strong attachment to one's roots, the land and respect for traditions.

AAVTA is a British brand specializing in wine cooling, we know how to develop fully, wines must mature under specific conditions. The ideal preservation of fine wines requires several conditions such as the control of temperature, humidity and vibration are extremely important.

Designed with a smoked glass door to protect the wine from harmful UV light. Proper humidity is essential, if humidity is too low the cork will dry out and shrink, our wine coolers guarantee ideal conditions. Excessive vibration can cause corks to shift, decorated with stainless steel door frame and front end shelves for optimum wine storage. Our wine cooler is equipped with different sizes and capacities, choice of storage from 28 bottles to 157 bottles.
