

BioBond

TRADING COMPANY

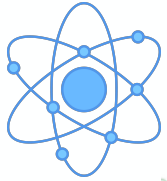

BIOBOND TRADING COMPANY

is a trusted name in the chemical trading industry, dealing in a wide range of high-quality industrial and specialty chemicals

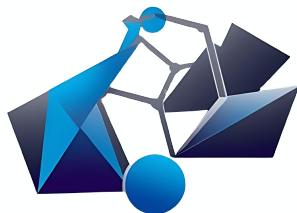

BioBond
TRADING COMPANY

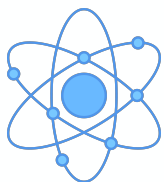

BIOBOND TRADING COMPANY offers premium-quality Ferrous Sulphate Crystals, widely used in industrial, agricultural, and water treatment applications. Our product is known for its high purity, consistent quality, and reliable performance, making it suitable for diverse chemical and manufacturing processes.

Product Features:

- High-purity crystalline form
- Excellent solubility and stability
- Precise composition for consistent results
- Available in bulk and customized packaging

BioBond
TRADING COMPANY

BIOBOND TRADING COMPANY supplies high-quality Zinc Sulphate, a versatile chemical compound widely used in agriculture, water treatment, pharmaceuticals, and industrial applications. Our product is known for its purity, accuracy in composition, and consistent performance.

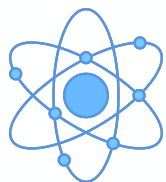

Product Features:

- Available in Heptahydrate and Monohydrate forms
- High purity and excellent solubility
- Free-flowing crystals for easy handling
- Packed securely to maintain quality and shelf life

BioBond

TRADING COMPANY

Product Features:

Available in Heptahydrate (Epsom Salt) and Monohydrate forms

High purity and excellent solubility in water

Uniform crystal size for easy handling

Safe and eco-friendly composition

Applications:

Agriculture: Used as a soil conditioner and magnesium fertilizer to enhance crop yield

Pharmaceuticals: Commonly used in bath salts and medical preparations

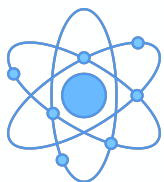

Industrial Use: In paper, textile, and chemical manufacturing

Animal Feed: Serves as a vital magnesium supplement

BioBond

TRADING COMPANY

BIOBOND TRADING COMPANY supplies high-quality Boric Acid Powder, widely used in industrial, pharmaceutical, agricultural, and household applications. Our boric acid is known for its high purity, fine texture, and reliable chemical stability, making it suitable for multiple industries.

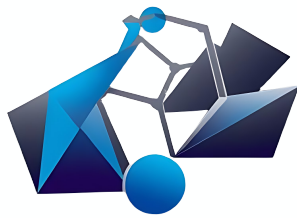

Applications:

Industrial Use: In glass, ceramics, and enamel manufacturing

Agriculture: As a micronutrient for plant growth

Pharmaceuticals & Cosmetics: Used in antiseptics, eye drops, and skincare formulations

Household & Insect Control: Effective for pest control and cleaning purposes

BioBond

TRADING COMPANY

BIOBOND TRADING COMPANY is a leading supplier of high-quality Copper Sulphate, known for its purity, consistent composition, and versatile industrial applications. Our Copper Sulphate is carefully processed and packed to meet international quality standards, ensuring superior performance across various industries.

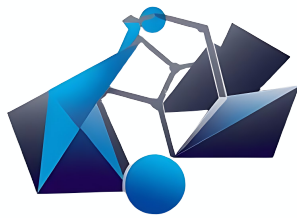

Applications:

Agriculture: Used as a fungicide, pesticide, and micronutrient fertilizer

Electroplating & Mining: Essential in metal finishing and ore processing

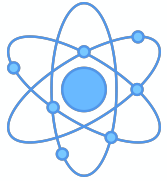

Textile & Leather: Used in dyeing, printing, and tanning processes

Water Treatment: Helps control algae and bacteria in water systems

BioBond

TRADING COMPANY

BIOBOND TRADING COMPANY offers high-quality Sulphur Powder, widely used in agriculture, rubber, chemical, and pharmaceutical industries. Processed from pure sulphur, our product is known for its fine texture, high purity, and reliable performance in various applications.

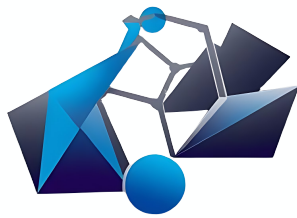

Applications:

Agriculture: Used as a fungicide, pesticide, and soil conditioner

Rubber Industry: Essential for vulcanization processes

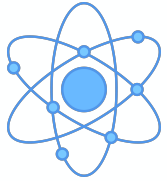

Chemical Manufacturing: Used in production of sulphuric acid and other compounds

Pharmaceuticals: For medical and skincare formulations

BioBond

TRADING COMPANY

BIOBOND TRADING COMPANY is a reliable supplier of high-quality Zinc Sulphate, used across agricultural, pharmaceutical, and industrial sectors. Our product is formulated with precision to ensure high purity, excellent solubility, and consistent composition, meeting global quality standards.

Applications:

Agriculture: Used as a zinc micro nutrient fertilizer to prevent crop deficiency

Animal Feed: Improves livestock health and growth

Water Treatment: Acts as a clarifying and conditioning agent

Industrial Use: In electroplating, textile processing, and chemical synthesis
