

Motorized Particle Size Analysis Systems

Accelerate Research, Enhance Accuracy, and Streamline Workflows with Next-Gen Laboratory Automation & Imaging Solutions.

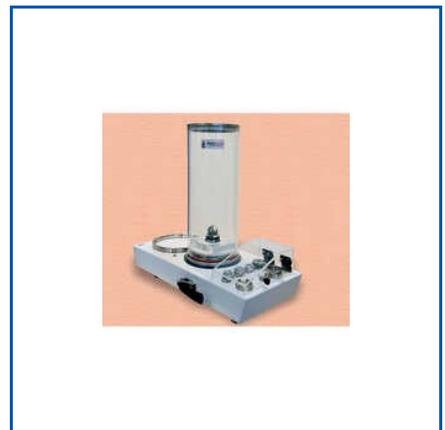

Cosmo - FMT (Foreign Matter Analyser), Cosmo - MicroBioCount - Automated Colony Counter, Cosmo - Micrometry (Advanced measurement tools), Cosmo - MorphID (Raman Analyser), Cosmo - PMT (Particulate Matter Analyser), Cosmo - PSA (Particle Size Analyser), Cosmo - Dry Powder Dispenser, etc.

COSMO - PSA (PARTICLE SIZE ANALYSER)

COSMO - MORPHID (RAMAN ANALYSER)

COSMO - DRY POWDER DISPENSER

About Us

A global microscopy solutions company specializing in particle size analysis, intelligent imaging, and compliant data management, our organization helps regulated labs see more, measure better, and decide faster. With more than 20 years of experience, a technical team of imaging scientists, microscopy experts, and specialist software and automation engineers designs and delivers highprecision particle size analyzers, motorized microscopes for filter paper and particulate matter analysis, fully automated Aldriven colony counters, and powerful imaging softwareeach system engineered to meet stringent 21 CFR Part 11 requirements so data is always secure, traceable, and auditready. Backed by 150+ installations across pharmaceuticals, industry, food, agrochemicals, and research labs worldwide and a dedicated presence in India and the UAE, the company combines deep application expertise with responsive local support to provide microscopy and image analysis solutions that accelerate QA, QC, and R&D workflows.

Microcosmos Imaging Systems Private Limited, established in 2023 in Pune, Maharashtra, India, is a growing Manufacturer, Service Provider, Exporter, and Supplier specializing in advanced laboratory automation and imaging solutions. Our product range includes Automated Dry Powder Dispenser Unit, Automated Dry Powder Slide Preparation, Particle Size Analyzers And Motorized Stage Microscopes and Motorized Particle Size Analyzers Systems . We design each system with precision engineering and modern automation to support accurate measurements, efficient workflows, and long-term operational stability. Our solutions cater to pharmaceuticals, microbiology labs, research organizations, material testing units, and quality control facilities.

Key Facts

No of Staff	8
Year of Establishment	2023
OEM Service Provided	No

Our Products

Cosmo - MicroBioCount -

Cosmo - PMT (Particulate Matter)

Cosmo - FMT (Foreign Matter Analyser)

Cosmo - Micrometry (Advanced)

ADDRESS

4th Floor, SR No. 133/12 134, Office No.402, Brand Square, Pimpale Saudagar Road, Pimpale Saudagar, Pune, Maharashtra, India (411027).
