About Us

Founded in 1984 by Shri Mahendra Gajjar, Hardik Industries has established itself as a trusted name in the field of pharmaceutical machinery manufacturing. Since the inception, our endeavor has been to design, develop, and deliver equipment that caters to the emerging demands of pharmaceutical companies, research institutions, and educational organizations. Over time, we have surged ahead by building our capabilities and product range to become one of the leading manufacturers in tablet section machinery and lab-scale equipment in India.

The growth of the community may automatically justify increases in faculty and operating expenditures, or there may be further debate about the right relationship between community size and resource utilization. Over the years, the company has developed into a leading manufacturer, supplier, and exporter of a wide range of pharmaceutical and allied machinery such as Automatic Packaging Conveyors, Colloid Mill, Dust Extractor, Dies And Punches, Mass Mixer, and more. Each machine is designed for smooth performance, consistent output, and long service life, thereby making them ideal for pharmaceutical production units and research environments.
