About Us

Raj Instruments India is a major manufacturer, supplier, and service provider of high-quality testing and surveying instruments based in Ahmedabad, Gujarat, India. Established in 2009, we have built our business around one simple principle: accurate instruments create reliable results, and reliable results create better engineering decisions. Over the years, we have developed a strong understanding of the requirements of construction companies, infrastructure developers, engineering consultants, laboratories, educational institutions, contractors, researchers, and quality-control professionals. Our focus is not simply on supplying instruments, but on providing dependable solutions that support testing, measurement, inspection, and quality assurance.

Raj Instruments India, established in 2009 in Ahmedabad, Gujarat, is a trusted manufacturer, supplier, and service provider of reliable testing and surveying instruments. With years of industry experience, we are committed to delivering accurate, durable, and practical solutions for laboratories, construction companies, infrastructure projects, engineering professionals, educational institutions, and quality-control departments. Our product portfolio covers a wide range of Surveying Instruments, Soil Testing Instruments, Cement and Concrete Testing Instruments, and Aggregate Testing Instruments, designed to support precise measurement and dependable testing across diverse applications.
