About Us

TASK INDUSTRIES is an ambitious manufacturer, supplier, and exporter that provides the best packaging and labeling automation systems to the current industry. Having a profound understanding of the field and massive attention to excellence in engineering, we produce systems that bring speed, accuracy, and consistency to production. All solutions are created to support the optimization of the operations, productivity, and the provision of perfect finishes in various packaging applications. We specialize in automatic bottle sticker labeling machine, oil tin labeling machine, packaged drinking water filling machine and automatic shrink wrapping machines; we have merged innovation with reliability to suit the changing industrial requirements. All the machines are engineered to be smoothly automated and correctly used to achieve identical outcomes, even in very fast production lines. The systems are assembled using strong parts and high-quality structures that offer long durability and reduce downtime.

Our philosophy is still based on energy efficiency and ease of operation. The user-friendly controls can be easily handled without a lot of supervision, and the configuration is flexible, allowing it to integrate with diverse packaging formats and existing production lines. Minimal maintenance design also contributes towards productivity without time disruption, and maximised output.
