About Us

Nka Engineering Solutions is a trusted trader and supplier of premium electrical components based in New Delhi, Delhi, India. Established in 2019, we have steadily built a reputation for delivering dependable products that meet modern industrial and commercial requirements. Our focus is on supplying high-performance electrical equipment that enhances operational safety, efficiency, and durability. With a commitment to quality and service excellence, we aim to become a preferred sourcing partner for clients across diverse sectors. We specialize in supplying Magnetic Contactor, Push Button Switches, Power Contactor, Noise Filter and Electric Switchgear. Each product is sourced from reliable manufacturers and complies with applicable industry standards. Our portfolio supports applications in control panels, automation systems, power distribution networks, and machinery operations. By offering a carefully selected range of components, we ensure compatibility, performance consistency, and long service life for every installation requirement.

Quality is central to our business philosophy. We follow a systematic vendor selection process to ensure that every product supplied meets stringent technical specifications. Our team verifies product standards, operational efficiency, and durability before dispatch. By maintaining strong relationships with trusted manufacturers and distributors, we are able to provide reliable electrical solutions that reduce downtime and support seamless functionality in demanding environments. Since our inception in 2019, we have focused on expanding our product portfolio and strengthening our supply network. Operating from New Delhi allows us to efficiently serve customers across India. Our objective is to support infrastructure growth and industrial development by providing dependable electrical components that meet evolving technical demands. As we continue to grow, we remain dedicated to integrity, operational excellence, and delivering measurable value to every client we serve.
