

Mild Steel Double Gas Cylinder Trolley

Product Overview

Experience efficiency with the Mild Steel Double Gas Cylinder Trolley. Built with a welded, powder-coated mild steel frame, it is corrosion resistant and designed to safely transport two oxygen cylinders. Its compact design, four solid rubber wheels, and robust construction ensure smooth movement and long service life.

Industrial Applications

Ideal for factories, hospitals, laboratories, welding shops, and industrial facilities. It provides safe and efficient handling of two gas cylinders while reducing manual effort.

Supply & Delivery

Available across India with competitive quotations, prompt dispatch, secure packaging, and reliable delivery for industrial customers.

Frequently Asked Questions

Q1: How many cylinders can it carry?

A: It securely transports two gas cylinders simultaneously.

Q2: What makes its construction durable?

A: Welded mild steel construction with a corrosion-resistant powder-coated finish.

Q3: Where is it commonly used?

A: Hospitals, industries, laboratories, and welding workshops.

Q4: How can I place an order?

A: Request a quotation, confirm your order, and we will arrange prompt shipment.

Q5: How is the trolley packaged?

A: Each trolley is sanitised and securely packed to prevent damage during transit.
