

Mild Steel Material Handling Trolley

Take advantage of this monumental opportunity to secure an unparalleled Mild Steel Material Handling Trolley, crafted specifically for industrial environments. Featuring a robust welded frame and a medium-sized open platform with raised side supports, this trolley is designed for heavy-duty material movement. Its PU caster wheels provide effortless mobility on smooth surfaces, while an ergonomic, rubber-coated handle ensures a secure grip and comfort. With a lifting capacity of 400 kg, this pre-assembled trolley is an exceptional addition to any industrial setup.

Commercial Applications and Versatility

Our Mild Steel Material Handling Trolley is ideal for warehouses, factories, logistics centres, manufacturing units, and storage facilities. It is designed to transport cartons, boxes, and heavy materials efficiently while ensuring safe handling through its raised platform edges.

Domestic Market Reach and Delivery

Available across India with prompt quotations, timely shipping, delivery updates, and sample availability before bulk orders.

Frequently Asked Questions

Q1: How does the trolley ensure safe operation?

A: It features a rubber-coated ergonomic handle, raised platform edges, and PU caster wheels for stability and smooth movement.

Q2: How can I order the trolley?

A: Request a quotation, confirm the order, and receive shipment with delivery tracking across India.

Q3: Are samples available?

A: Yes, samples can be requested before placing bulk orders.

Q4: Where is the trolley best used?

A: Warehouses, factories, logistics centres, and industrial facilities with smooth flooring.

Q5: What are the benefits of the powder-coated finish?

A: It improves durability, corrosion resistance, and provides an attractive finish while the raised platform secures goods during transport.
