

**Product Description: Stainless Steel Serving Trolley**

This is a durable stainless steel serving trolley designed for efficient transportation of food, utensils, dishes, and kitchen supplies in commercial environments. The trolley features a strong two-tier structure with smooth mobility, making it ideal for restaurants, hotels, hospitals, and catering services.

Key Features: High-quality stainless steel construction for durability and corrosion resistance. Two spacious shelves for carrying food trays, utensils, or equipment. Strong tubular frame for enhanced stability and support. Smooth-rolling caster wheels for easy movement and maneuverability. Easy-to-clean surface suitable for hygienic food service operations. Compact and practical design for commercial and industrial use. Applications: Suitable for restaurants, hotels, cafeterias, hospitals, catering businesses, and food service environments requiring efficient material handling and serving solutions.
