About Us

In 1979 Bhagwan Dass established Fasteners King with limited resources and employees. In addition, he was dedicated to quality and service to build one of Indias oldest names in fastener and building solution industry. When Ashok Kumar graduated from College in 1982 he joined the family business and breathed new life into it with new ideas and a desire to succeed. His work helped to improve sales and market the company to new customers and established the company as a viable supplier. In 2011 the third generation of leadership became involved in the business when Rahul Setia joined the business with the goals of modernizing and thinking global. He secured distributor rights on many well-known foreign brands which gave Fasteners King the opportunity to export and provide additional product lines.

In 2021, 2022, 2023, 2024 And 2025 (RECORD HOLDER), Fasteners King was awarded the title of Number 1 Channel Partner for Fischer in India. This was a recognition of the companys leadership in the industry based on their consistent performance, customer satisfaction, and a great team of 28 members that were with the company at that point. The company opened another significant chapter in 2024, when it began operations in the Northeastern region of India with its new office in Guwahati (in the list of its regional expansion). With a growing number of professionals to 40 members on the team and a well-established logistics network, Fasteners King commits to developing this new territory with the same service excellence and reliability as its brand.
