About Us

Well integrated with latest technology and ultra-modern production facilities, we, J. K. Technologies Pvt. Ltd., are successfully catering to the needs of our clientele. Established in the year 2000, we have grown by the manifolds owing to our unrelenting efforts and commitment towards quality. Today, we are acknowledged as a renowned Manufacturer, Importer, Trader and Service provider of the industry. We are engaged in manufacturing a sturdy range of Storage Containers, Shipping Containers, Office Containers, Porta Cabins, Portable Toilets, Portable Houses, Bunk Houses, etc.

We are a leading manufacturer and supplier of pre-fabricated buildings that provide high-flexibility with excellent load bearing capacity. These containers come with excellent advantages over various conventional buildings. When a conventional building is designed, it pollutes environment in many ways. On the other hand, pre-fabricated office does not produce any pollution. A conventional building construction process pollutes the soil as it is mixed up with sand, cement, gravel etc. Lots of water is also wasted during the manufacturing of conventional buildings, whereas pre-fabricated containers can conserve water. They are also used for the water conservation in the domain of irrigation, agriculture, farming, plantation etc. Widely used in site offices, movable storage solutions, our wide array is developed by using premium quality MS sheet, plywood, insulation material, etc. Moreover, we make sure that all our products are fabricated in compliance with the superior industrial standards and norms. Due to our impeccable quality products and services, we have been able to garner a vast customer base across the nation. Some of our prestigious clients include IOCL, EIL, SAIL, Siemens, Afcons, Larsen & Toubro Ltd, UHDE, Technimont India Pvt Ltd, Galfaar engineering and many more.
