*Standard deviations applicable

Durakolor Z & C - Purlin

Durakolor Z & C purlin is a revolutionary product which has been technically approved and accepted all over the world by architects & engineers. Its extraordinary shape increases its strength and load taking capacity. Usage of Durakolor purlin results in cost saving upto 50% in structural steel as compared to traditional rolled sections (like Angle / Channel / Beams) and Hollow Sections (like Round Pipes / SHS / RHS). It is available in customised lengths, thus there is no need of any fabrication, cutting or welding at the site. Hence there is no material wastage or fabrication cost. It is also available in various thickness and sizes. The customer also has the option to buy high quality Galvanised Purlin.

Benefits

Height (mm)*

140
160
180
200
220
240
250
300

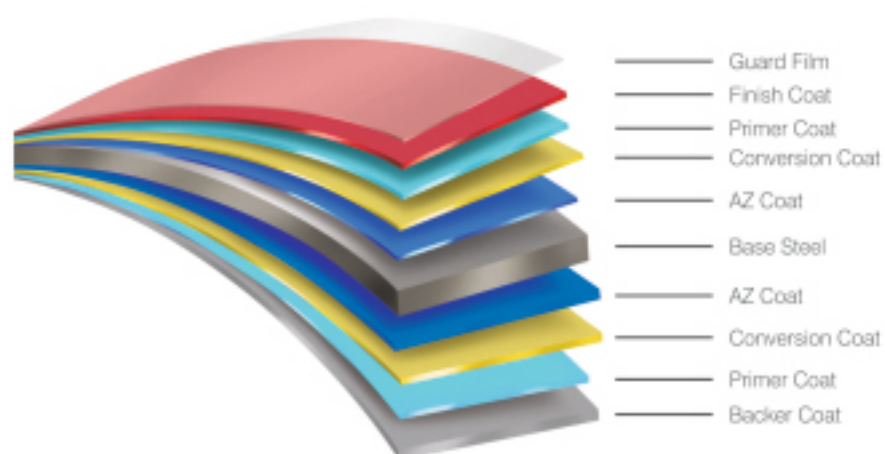

- * Longer Life
- * Easy Installation
- * Easy Maintenance
- * High Tensile Strength
- * Flat Surfaces provide better support & resistance
- * Light Weight yet stronger than conventional purlins
- * Customised Length & Thickness available
