

White Mica

Product Overview

Premium quality White Mica (Muscovite) sourced from Nigeria with minimum 99% purity, excellent transparency, low iron content, and superior heat resistance up to 800°C. Available in flakes, powder, and lump forms with customized packaging options.

Applications

Widely used in paints, plastics, rubber, ceramics, cosmetics, construction materials, electrical insulation products, and engineering applications. Its dielectric strength, heat resistance, and bright white appearance make it highly versatile.

Technical Features

Purity: 99% Minimum

Heat Resistance: Up to 800°C

Approximate Melting Point: 1200°C

Water Solubility: Insoluble

pH: Neutral

Packaging & Supply

Available in HDPE bags, jumbo bags, and custom packaging as per buyer requirements. Reliable domestic and export supply with efficient logistics support.

Storage

Store in a dry environment away from moisture to maintain quality and performance.
