

Metal Coils & Sheet

Sandwich Panels Features:

- Lightweight: Installation is simple as well as flexible, thanks to its lightweight.
- Heat insulation & temperature retention: Excellent thermal insulation, and temperature resistance range from -110 to 50.
- Durable & pleasant appearance.
- Good sound insulation performance.
- Use of environmental materials, environmentally friendly.
- Different thickness available.
- Minimum thickness: 50mm (wall panel) / 40mm (roof corrugated sandwich panel)
- Maximum thickness: 150mm (exclude corrugated sandwich panel)

Sandwich Panels Specifications :

- Fireproof & waterproof
- Low thermal conductivity
- Easy to install
- Color-coated steel surface
- ISO 9001:2008 & CE certificated
