## Our Facility

To supplement our fast production process, we possess a well equipped modern infrastructure which comprises of state of the art machinery with ultra modern technology. Our manufacturing plant encompasses an area of about 1750 sq. metres with a installed capacity of 150 metric tons per months. With this production capacity, we are able to meet the growing demands of our client based in different parts of the world.

We are able to carry out different processes at a time and thereby offering a variety of pure and Durable high purity chemicals. Some of the facilities offered at our unit are following:

- Ms Glass Line Reactors (500 to 8000Ltrs)
- SS 316 Reactors (500 to 5000 Ltrs)
- Temperature Range to 5° to 250°
- SS Centrifuge 36" and 48"
- Tray Dryer and FBD Dryer
- Vaccum Distillation Unit
- MSRI Centrifuge 48")
- Fluid bed dryer & tray Dryer
- Pressure filter & leaf Filter
- Oil Vacuum distillation Unit.

We have all the major utilities to support our manufacturing process such as; Steam Boiler, Thermic Fluid heater, Cooling Tower, Chilling Plant & steam Jet and water Jet ejector. In addition to it, we are paying our utmost attention in up gradation of our range of utilities. This has helped us to complete the bulk demands within the desired time limit.
