About Us

AB Rubber Engineering is a trusted manufacturer, supplier, and trader of premium quality rubber products, committed to delivering dependable solutions for a wide range of industrial and commercial applications. Established in 2024 and based in Faridabad, Haryana, India, we combine modern manufacturing practices with stringent quality standards to develop products that consistently meet customer expectations. Our extensive product portfolio includes Bridge Compression Seal, Glazing Rubber Profile, Rubber Clamp, Solar Rubber Beading, Solar Panel Gasket, Drainage Spout, and several other specialized rubber components engineered for performance and durability. Every product is manufactured using quality tested raw materials and advanced production techniques to ensure excellent flexibility, dimensional accuracy, weather resistance, and long lasting functionality.

Understanding that every industry has unique requirements, we focus on providing customized solutions that match specific technical and operational needs. Our dedicated professionals work closely with clients to maintain superior product quality, timely deliveries, and responsive customer support throughout every project. Driven by innovation and continuous improvement, we strive to build long term business relationships through reliability, transparency, and customer satisfaction. Our commitment to excellence enables us to serve industries such as construction, infrastructure, renewable energy, automotive, engineering, and industrial manufacturing with products that perform efficiently even in demanding environments. Quality and trust remain the foundation of everything we manufacture and supply.
