About Us

Veer Machinery is one of the finest companies in the market for machines and tools that are used to develop products from wires. We started our operations in 2000 and since then have been doing excellent work in the business of making Wire Straightening Machine, Wire Benders, Tig Wire Machinery, Pay Off Stand, CNC Wire Bending Machine, and many other products. These machines are developed with precision to have excellent output at a low cost. We develop machines by assembling high-power motors with strong components, tools, and equipment. In order to develop machines, we have specialized experts with rich skills and intelligence in the product manufacturing domain. Our machines are widely praised for their fluent performance, low maintenance, robust build, and reliability. Furthermore, we give complete support to our customers by providing them with after-sales service for machines, including installation and maintenance.

With passion, expertise, and excellence in the business line of Tig Wire Machinery, Wire Straightening Machine, Pay Off Stand, and related products, we, Veer Machinery, have gained a reputed status in the market. We are deeply involved in the manufacturing of these machines. We have the right facilities and team to prosper in the business line. We perform our functions in Ahmedabad, Gujarat, India-based setup, which connects us with major shipment routes.
