

SS Nut Bolt Set

Product Overview

Discover the invincible strength and opulent performance of our SS Nut Bolt Set, now on sale for bulk and custom orders. Engineered for durability, these premium fasteners feature mirror or matte finishes and are built from A2/A4 (304/316) stainless steel. Available in lengths from 10 mm to 200 mm with excellent rust resistance, they are ideal for automobile, construction, and machinery applications. ISO-certified manufacturing, MOQ: 100 sets, with fast bulk supply.

Superior Applications & Robust Features

The SS Nut Bolt Set performs reliably in automobiles, industrial machinery, and construction. Manufactured from premium 304/316 stainless steel, it offers high tensile strength, non-magnetic properties, superior corrosion resistance, and precise tolerances. Available with full or partial threads and multiple drive types, it provides long-lasting performance in demanding environments.

Sampling, Payments & Packaging

Request a sample or quotation through our sales team for prompt assistance. Flexible payment terms are available for bulk and custom orders. Products are securely packed in boxes, bags, or bulk packaging to protect the finish and ensure safe, timely delivery.

FAQs

1. Sample/Quotation: Contact our sales team with your requirements.
2. Benefits: High tensile strength, corrosion resistance, and long service life.
3. Delivery: Quick dispatch after payment confirmation.
4. Applications: Suitable for automobiles, construction, machinery, and industrial fastening.
5. Material & Standards: A2/A4 (304/316) stainless steel conforming to DIN, ASTM, and ISO standards.
6. Rust Resistance: Achieved through premium stainless steel, polishing, passivation, and advanced surface treatments.
