

SS U Bolt Clamp

Product Overview

Discover our SS U Bolt Clamp, designed for high performance and reliability. Suitable for diameters from 6 mm to 20 mm with thread lengths between 20 mm and 80 mm. Manufactured from premium SS304/SS316 stainless steel, it features a polished rustproof finish, hex nut and flat washer for easy installation, and supports loads up to 2 tons. Ideal for pipe clamping, marine, automotive, and construction applications.

Advantages & Applications

The robust design ensures excellent durability in heavy-duty environments. Its polished finish provides outstanding corrosion resistance, making it suitable for metallic pipes, construction beams, automotive assemblies, and marine pipelines. Bolt-on installation using an external wrench allows quick and secure fastening while reducing installation time.

Export, Certifications & Packaging

The clamps are exported worldwide, including Europe, the Middle East, Asia, and North America. Manufactured in accordance with DIN 3570 and ASTM A193 standards, they are carefully packed in boxes or bulk packaging for safe transportation. Flexible payment terms are available for international buyers.

FAQs

1. Corrosion Resistance: Premium SS304/SS316 with polished and passivated finish.
2. Installation: Bolt-on method with hex nuts, flat washers, and external wrench drive.
3. Best Use: Pipe clamping in industrial, outdoor, marine, and heavy-duty applications.
4. Applications: Automotive, construction, marine equipment, and industrial piping.
5. Certifications: Manufactured to DIN 3570 and ASTM A193 standards.
