

Sheet Feeding Conveyor

Product Description

Discover a popular and affordable solution for high-speed production with our **Sheet Feeding Conveyor**—engineered for phenomenal performance and first-class reliability. Designed with a sturdy mild-steel frame and advanced geared motor drive, it delivers top-tier feeding accuracy (1 mm) and reduced noise (<70 dB). Benefit from adjustable height, digital controls, and a corrosion-resistant body. Accommodates sheet sizes up to 600 mm wide, materials from paper to thin plastics, and boasts an impressive load of 50 kg per meter.

Versatile Applications and Outstanding Advantages

Suitable for printing, packaging, and material handling industries. Its robust design, adjustable guides, and high-speed alignment system ensure precision and reliability. Ideal for feeding cartons, paper sheets, and packaging materials. Minimal maintenance and easy operation make it suitable for small and large businesses.

Certifications, Payment Terms, and Sample Policy

Each conveyor is carefully packed and dispatched after comprehensive inspection. Transparent payment terms and sample policies are available. Every unit is securely shipped and ready for installation.

FAQs

Q: How does it improve workflow efficiency?

A: It automatically feeds sheets at adjustable speeds, reducing manual work and increasing throughput.

Q: What materials are compatible?

A: Paper, cardboard, and thin plastic sheets.

Q: Where can it be used?

A: Printing presses, packaging plants, and flat-sheet feeding applications.

Q: How are different sheet sizes adjusted?

A: Adjustable guides and a digital control panel enable quick setup.

Q: Does it require frequent maintenance?

A: No. Corrosion-resistant materials and accessible components reduce maintenance time and cost.

Technical Details

Frame: Mild Steel

Drive: Geared Motor

Feeding Accuracy: ± 1 mm

Max Sheet Width: 600 mm

Load Capacity: 50 kg/m

Noise: <70 dB

Controls: Digital

Height: Adjustable
